Amirali Hosseinkhani

Nationality: Iranian **Date of birth:** 08/2003 **Gender:** Male **Phone number:** (+98) 9134016735

LinkedIn: https://www.linkedin.com/in/amirali-hosseinkhani-4a2914234

Home: Heravi Square, Tehran (Iran)

ABOUT ME

Computer Science graduate from Amirkabir University of Technology with three years of professional software engineering experience. Interested in distributed systems, AI infrastructure, and machine learning engineering, with a strong motivation to deepen technical expertise through advanced studies.

EDUCATION AND TRAINING

Computer Science

Amirkabir University of Technology (Tehran Polytechnic) [23/09/2021 – 07/05/2026]

City: Tehran | **Country:** Iran | **Field(s) of study:** Information and Communication Technologies: • Software and applications development and analysis | **Final grade:** 3.35 / 4.0 (16.17 / 20.0) | **Thesis:** Thesis: Bitcoin Price Prediction Using Deep Learning Algorithms

Thesis Grade: 19.5/20
Relevant Coursework:
• Artificial Intelligence
• Database Systems
• Data Mining
• Design and Analysis of Algorithms
• Data Structures
• Linear Optimization
• Probability and Statistics
• Theory of Computation
• Compiler Design
• Computer Networks

WORK EXPERIENCE

Golrang System (Golrang Industrial Group) – Tehran, Iran

Software Engineer

[07/11/2023 – Current]

• Progressed from software engineering intern to full-time software engineer while contributing to multiple enterprise-scale business systems.
• Designed and developed backend services, APIs, business logic, and database components using ASP.NET, SQL Server, Entity Framework Core, Dapper, and RESTful architectures.
Selected Contributions:
Fixed Asset Management System
• Implemented a significant portion of the system's business functionality and operational workflows.
• Developed backend modules supporting enterprise asset lifecycle management.
Finance System
• Developed the primary financial document management module and associated business workflows.
• Implemented backend services and database integrations supporting financial operations.
Treasury Management System
• Contributed to treasury process automation and enterprise financial management workflows.
• Developed and maintained business logic, APIs, and SQL Server components.
Advanced Planning and Scheduling (APS) System
• Developed forecasting and optimization functionality for enterprise planning and scheduling operations.
• Utilized Google OR-Tools to support optimization and scheduling decisions.

• Contributed to data-driven planning solutions integrating forecasting and optimization workflows.

Enterprise Text-to-SQL Platform

• Developed an OpenAI-powered Text-to-SQL solution using LangChain and Semantic Kernel.
• Enabled natural-language interaction with enterprise databases through automated SQL generation.
• Improved accessibility of structured business data for non-technical users.

PROJECTS

[23/09/2025 – 23/08/2026]

Bitcoin Price Prediction Using Deep Learning Algorithms

- Conducted an empirical study of Bitcoin price forecasting using a dataset from a published study, evaluating alternative statistical and deep learning approaches.
- Implemented and compared LSTM, GRU, ARIMA, SARIMA, and GARCH models using TensorFlow and statistical forecasting techniques.
- Performed data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation to investigate forecasting accuracy.
- Documented the methodology, experiments, and findings in a bachelor's thesis awarded **19.5/20**, with the research documented in a Zenodo publication.

SKILLS

Programming Languages

C# / Python / SQL / Type Script / Java Script

Backend Development

REST APIs / ASP.NET Web API / Entity Framework Core / Dapper

Databases

Sql Server / Stored Procedures / Database Design / Query Optimization

Artificial Intelligence & Machine Learning

TensorFlow / Large Language Model Applications / OpenAI API / Semantic Kernel

Forecasting & Analytics

LSTM / GRU / ARIMA

Optimization & Operations Research

Google OR-Tools / Scheduling Optimization

Developer Tools

GIT / AI-Assisted Development Tools (Claude Code, OpenAI Codex)

LANGUAGE SKILLS

Mother tongue(s): Persian

Other language(s): English

Demonstrated ability to quickly learn and apply new technologies across software engineering, machine learning, optimization, and large language model applications, supported by both academic and professional experience.
