ABOUT ME

Software Engineer with nearly 3 years of experience developing enterprise-scale software systems across finance, treasury, asset management, optimization, forecasting, and AI-powered applications. Experienced in backend development using C#, ASP.NET Core, SQL Server, Entity Framework Core, Dapper, and RESTful APIs. Strong background in machine learning, time-series forecasting, operations research, and large language model applications, with hands-on experience building forecasting solutions and OpenAI-powered Text-to-SQL systems. Demonstrated ability to rapidly learn and apply new technologies across software engineering, optimization, and artificial intelligence domains.

EDUCATION AND TRAINING

23/09/2021 – 07/05/2026 Tehran, Iran
BACHELOR OF SCIENCE (B.SC.) IN COMPUTER SCIENCE Amirkabir University of Technology (Tehran Polytechnic), Tehran, Iran

Thesis Grade: 19.5/20
Relevant Coursework:

- Artificial Intelligence
- Database Systems
- Data Mining
- Design and Analysis of Algorithms
- Data Structures
- Linear Optimization
- Probability and Statistics
- Theory of Computation
- Compiler Design
- Computer Networks

Website www.aut.ac.ir | **Final grade** 3.35 / 4.0 (16.17 / 20.0) |
Thesis Thesis: Bitcoin Price Prediction Using Deep Learning Algorithms

WORK EXPERIENCE

FULL-STACK SOFTWARE ENGINEER – GOLRANG SYSTEM (GOLRANG INDUSTRIAL GROUP) – 07/11/2023 – Current – TEHRAN, IRAN

Designed and developed enterprise-scale **ERP** software solutions using C#, ASP.NET Core, Angular, SQL Server, and Entity Framework Core.
Designed and implemented approximately 90% of the **Fixed Asset Management** System across database, backend, and frontend layers.
Contributed to the development of **Finance** and **Treasury Management** systems and related accounting workflows.
Designed and developed an **Advanced Planning and Scheduling** (APS) system, including production planning, capacity planning, material planning, and optimization-based scheduling capabilities.
Developed an AI-powered **Natural Language to SQL** platform for querying enterprise financial and asset-management databases.
Performed database performance tuning through query optimization, execution plan analysis, indexing strategies, and algorithmic improvements.
Participated in software architecture design, code reviews, engineering best practices, and technical mentoring within an 11-person software engineering team.

Collaborated with business stakeholders to translate complex operational requirements into scalable software solutions.

● **PROJECTS**

23/09/2025 – 23/08/2026

Bitcoin Price Prediction Using Deep Learning Algorithms

- Conducted research on cryptocurrency forecasting using deep learning and statistical forecasting approaches.
- Developed forecasting models using TensorFlow.
- Implemented and evaluated LSTM, GRU, ARIMA, SARIMA, and GARCH models.
- Performed data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation.
- Documented methodology, experiments, and findings in an academic thesis awarded a grade of 19.5/20.

22/12/2025 – 22/07/2026

Advanced Planning and Scheduling (APS) System

Designed and developed a production planning and scheduling platform for manufacturing environments. Implemented optimization-based planning models using Google OR-Tools to manage demand, resource constraints, capacity allocation, material requirements, and production scheduling decisions.

23/10/2025 – 22/08/2026

Natural Language to SQL Platform

Developed an AI-driven system that converts natural language questions into SQL queries for enterprise databases. Implemented semantic processing, database-aware query generation, and large language model integration to improve accessibility of organizational data.

20/04/2024 – 22/07/2025

Fixed Asset Management System

Led the design and implementation of a comprehensive ERP module covering asset lifecycle management, depreciation, accounting integration, reporting, and operational workflows across database, backend, and frontend layers.

● **SKILLS**

Programming Languages

C# | Python | SQL | Type Script | Java Script

Backend Development

REST APIs | ASP.NET Web API | Entity Framework Core | Dapper

Databases

Sql Server | Stored Procedures | Database Design | Query Optimization

Artificial Intelligence & Machine Learning

TensorFlow | Large Language Model Applications | OpenAI API | Semantic Kernel

Forecasting & Analytics

LSTM | GRU | ARIMA

Optimization & Operations Research

Google OR-Tools | Scheduling Optimization

Developer Tools

GIT | AI-Assisted Development Tools (Claude Code, OpenAI Codex)

● **LANGUAGE SKILLS**

Mother tongue(s): **PERSIAN**

Other language(s): **ENGLISH**

Demonstrated ability to quickly learn and apply new technologies across software engineering, machine learning, optimization, and large language model applications, supported by both academic and professional experience.
